ACCESS Technologies has been awarded with "INNOVATIONS" award for it's unique wired Marine Remote Commander - Model No. MRC-1, and the partner RC-1B (Black Version) for use in Mobile Electronics applications.

As a result of the on-going success of the ACCESS Technologies' remote control products, the company has been awarded with the prestigious Innovations Award, and the products will be on display in the Innovations 2001 selection at the upcoming Consumer Electronics Show in Las Vegas in January 2001.

The Remote Commanders are fully compatible with SONY® head units, and work with the RM-X2S, RM-X4S, and UniLink® capable car radios.

The functions include; Stereo / Mute Mode, Attenuate / Mute, Loudness Contour, Radio Station Channel / Tuning function, as well as Disc/Track and Tape directions.

Also featured are large "soft touch" back lit keypads, housed in a 400hr UV stable plastic housings.

The accessories and details include; Stainless Steel hardware, 6" attached cables with gold plated connectors, and optional extension cables in various lengths to suit all possible installation needs.

Both remotes meet all Marine Spec requirements for both UV and Salt Fog tests, all components are specifically designed and selected to withstand the rigors of both water and salt environments.

Functions include:

Volume Up, Volume Down, Seek/AMS Up, Seek/AMS Down, Disc Up, Disc Down, Source Selection, Mute, and Power On/Off.

For more information on the MRC-2 and RC-1B – MARINE / MOBILE REMOTE COMMANDERS and the other fine accessories from ACCESS TECHNOLOGIES, call or FAX the numbers listed above.
